The collage consists of 20 individual photographs arranged in a grid-like fashion. Each photo captures a child, ranging from young boys to girls, holding up a card they have made for their mother. The cards are highly creative, with some featuring cutouts, drawings, and heartfelt messages. For example, one card says 'Thank you Mom for everything' with a heart and umbrella, another says 'I LOVE MY MOM' with a large heart, and others include phrases like 'Happy Mother's Day', 'I Love You Mom', and 'Happy Mother's Day Mom'. The children are dressed in casual clothing, and the settings are typical home environments.

PW SPOTLIGHT FEATURE

School Education Pedagogy

During the lockdown lots has been written about the way school kids would be taught in schools and at home in the Post COVID 19 months. But talking about a Generational change on the Method and Practise of teaching in Schools is a very tall ask, especially when the SOPs are still evolving on COVID 19 and one is hoping that the present phase is just an Aberration. No doubt most of the private schools have started ON LINE classes in the last 12-14 weeks and plan to run these classes till the schools re-open. Whereas students of 9th to 12th would be having On Line classes for 2-4 hours a day and those in Nursery wing would be limited to 1-2 hours. These classes are mostly Theoretical in nature and the institutions at present are using this time period to cover some of the course and are hoping to re-open sometime in Sept or Oct.

Besides the Three R's, the schools play a very vital role in shaping the Character of the students. Basically helping the child to try and live upto her or his Full Potential is SCHOOLING.

While ON LINE Education as a model can perhaps be adopted successfully in Colleges and Universities, this will not be the case for Schools. Here the age of students varies from 3 years to around 18 years in K-12 schools. These are the Formative years in an individual's life. Besides the Three R's, the schools play a very vital role in shaping the Habits, Personality and ultimately the Character of the students. In schools kids are exposed to a whole lot of activities, competitions, sports, drills, interaction and so on, the list is endless. Spirit of Comradeship, friendship, sharing and caring are an integral part of schooling. Exposing tiny toddlers to the wonders of music, dance, art & craft, hobbies, drama, debates, science etc is basically helping the

TRUE SCHOOLING & ONLINE VERSION

child to try and live upto her or his Full Potential is SCHOOLING. Another integral part of growing up is Discipline, time management and Sense of Responsibility. School days prepare an individual to have the ability to withstand pressure and handle stressful situations in future adult life. The immortal words of Duke of Wellington “The battle of Waterloo was won on the playing fields of Eton” bears testimony to what school is. Education is not filling of a Pail, but the lighting of a Fire. The years at school hone the soft skills of the students, which is of Paramount importance in adult life. All the above skills cannot be taught to a child On Line. At the moment the schools are hoping that the present phase is just an Aberration, exposing growing up kids to many hours of Computer or Digital screens is not the way ahead.

CHALLENGES AHEAD for schools.

As and when the schools reopen the biggest challenge is going to be SOCIAL DISTANCING of students in class rooms, fields, buses etc. The schools will have to run at 50% of the capacity with all classes divided into Odd and Even roll number groups. Odd roll number students will attend the school on Odd dates and vice versa. With 50% reduction in the number of students in class rooms and buses, some semblance of SOCIAL DISTANCING can be maintained. Naturally school assembly will be in classrooms and the mid-day break in staggered intervals. Majority of the sports and Co-Curricular activities would have to be cancelled. In the era of Social Distancing, events like Parent teacher Meetings, Annual days, sports and graduation days would not be possible. All inter

Besides the Three R's, the schools play a very vital role in shaping the Character of the students.

school, inter state competitions would not be possible. In fact most of the inter class activities would not occur. All this will make JACK a very dull boy and very adversely impact the Psychological, Physical and Mental growth of kids. We the school

sector all over the world globe are praying that the COVID 19 Era is a temporary Aberration and will be over by Sept or Oct.

As on mid May nearly 1.3 Billion students are missing school in 186 countries, they all are praying that soon a Vaccine will be developed and COVID 19 would be a bad memory. Never say never again, COVID – 19 Era too shall pass. School is a building which has 4 walls with TOMMOROW INSIDE.
